

CHETNA CHANDWANI

Newark, CA · chandwca@gmail.com · +1 513-807-1077 · [linkedin.com/in/chetna-chandwani](https://www.linkedin.com/in/chetna-chandwani) · [chetna.dev](https://github.com/chetna-dev)

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES5/ES6), Kotlin, Java, Python, HTML5, CSS3
Frameworks	Next.js, React.js, React Native, Node.js, Nest.js, Spring Boot, FastAPI, Vue.js, AngularJS
API & Data	GraphQL, RESTful APIs, Redux, Zustand, PostgreSQL, Supabase, Spring Cloud
Auth	Supabase Auth, JWT, Role-Based Access Control (RBAC), Custom Claims
CI/CD & Infra	GitHub Actions, Docker, Flyway, Render, AWS (fundamentals), Git
Testing/Tools	Cypress (E2E), Figma, shadcn/ui, Drools, Flowable BPMN

PROFESSIONAL EXPERIENCE

Frontier Commons | Software Engineer

Apr 2026 – Present

- Building **Frontier Connect**, a full-stack faith-based trust & referral platform enabling ministries to coordinate verified introductions and student handoffs so people relocating to new cities stay connected to healthy faith communities.
- Architected full stack with **Next.js, React, TypeScript, Spring Boot (Kotlin), PostgreSQL, Supabase**; implemented **Supabase Auth, JWT custom claims, RBAC**, admin/ministry portals, onboarding workflows, and email notifications via Resend.
- Owned end-to-end **CI/CD pipeline** with **GitHub Actions & Docker**; automated deployments to **Render**; managed database migrations with **Flyway** and delivered full UAT deployment infrastructure.

Adroitts | Software Engineer

Aug 2023 – Apr 2026

- Architected and delivered 3 production-grade applications (sports marketplace & compliance platforms) using **React.js / React Native** with **Spring Boot (Kotlin)** and **FastAPI** backends; integrated **RESTful APIs** for scalable client-server communication, improving feature delivery timelines ~15–20% through modular architecture.
- Optimized frontend performance via **Redux, Zustand**, code-splitting, and 20+ reusable **shadcn/ui** components — reducing initial page load by ~20–25% and UI defects by ~15–20%.
- Built a POC configurable decision engine using **Drools** with **Flowable BPMN** orchestration for real-time rule updates without redeployment; led sprint demos for a 5-engineer team at ~85–90% sprint reliability.

IT Solution Center, Univ. of Cincinnati | Part-Time Developer

Jan 2022 – Apr 2023

- Built a virtual event platform with **React.js** and **GraphQL** supporting 200+ participants with video streaming and live judging for the University IT Expo.
- Implemented end-to-end UI testing with **Cypress**, building automated test suites for user flows and platform functionality, improving release reliability and reducing regression defects.

JMAN Group | Software Engineer

Dec 2020 – Dec 2021

- Developed an education management platform using **Laravel, Vue.js**, and **PostgreSQL**, enabling faculty with lesson planning, assessments, and real-time student progress dashboards.
- Built an HR system with **AngularJS** and **Node.js** for 100+ employees, automating timesheets, leave approvals, and performance reviews; implemented **cron-based automation** reducing manual survey effort by ~30–40%.

PROJECTS

Configurable Rule Engine with BPMN Workflow Integration — Full-stack engine using **Spring Boot & React.js**, integrating **Drools** with **Flowable BPMN** for dynamic decision-making; built a drag-and-drop BPMN designer using **React Flow** with visual process configuration, live runtime rule updates, and embedded rule execution against incoming data.

EDUCATION

M.S. Information Technology — University of Cincinnati

Apr 2023

B.E. Electrical & Electronics Engineering — Anna University

Sep 2020

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900)

May 2024

Microsoft Azure Data Fundamentals (DP-900)

Dec 2022
